ATD LEVEL II

FUNDAMENTALS OF FINANCE

WEDNESDAY: 27 November 2019.

Time Allowed: 3 hours.

Answer ALL questions. Marks allocated to each question are shown at the end of the question. Show ALL your workings.

QUESTION ONE

- (a) Describe the functions of the following financial market participants:
- (i) Brokers. (2 marks)
  - (ii) Investment banks. (2 marks)
  - (iii) Securitiser. (2 marks)
- (b) Discuss four ways in which the potential agency problems between shareholders and the management could be resolved. (8 marks)
- (c) Christopher Omondo borrowed Sh.2,500,000 from Betacom Bank Ltd. at an interest rate of 15% per annum. The loan is to be repaid semi-annually over a period of 3 years. The interest on the loan is to be paid on a reducing balance basis.

Required:

- (i) The amount of each semi-annual instalment payable for the loan. (2 marks)
- (ii) A loan amortisation schedule. (4 marks)

(Total: 20 marks)

QUESTION TWO

- (a) (i) In relation to time value of money, describe three interpretations of interest rates. (3 marks)
- (ii) In 1988, the average cost of an asset was Sh.1,800. Thirty years later, in 2018, the average cost of the same asset was Sh.13,700.

Required:

- The growth rate in the asset value over the 30 year period. (2 marks)
- (b) Propose four factors that could influence a firm's cost of capital. (8 marks)

- (c) Juhudi Ltd. is considering investing in a new machine that will cost Sh.1,000,000 at time 0. The machine can be sold after three years for Sh.100,000. To operate the machine, Sh.200,000 must be invested at time 0 in inventories. These funds will be recovered when the machine is retired at the end of year 3. The machine will produce sales revenue of Sh.900,000 per year for 3 years. Variable operating costs excluding depreciation will be 50% of sales. Operating cash inflows will begin in year 1 from today (at time 1). The machine will have depreciation expenses of Sh.500,000, Sh.300,000 and Sh.200,000 in years 1, 2 and 3 respectively. The company has a 30% tax rate and a 10% cost of capital. Assume inflation is zero.

Required:

- (i) The projects net present value (NPV). (6 marks)
- (ii) Advise the management of Juhudi Ltd. on whether to undertake the project based on your result in (c) (i) above. (1 mark)

(Total: 20 marks)

### QUESTION THREE

- (a) Summarise five rights of equity shareholders of a company. (5 marks)
- (b) Highlight four disadvantages of Islamic finance. (4 marks)
- (c) Oak Ltd. is considering undertaking a project that has an upfront cost and a series of positive cash flows. The project's estimated cash flows are summarised below:

Year	Project cash flow Sh. "000"
0	?
1	500
2	300
3	400
4	600

The project has a regular payback period of 2.25 years.

**Required:**

- The project's internal rate of return (IRR). (5 marks)
- (d) Explain three reasons why a company might prefer to issue bonus shares instead of paying cash dividend. (6 marks)  
(Total: 20 marks)

### QUESTION FOUR

- (a) Suggest five reasons for prolonged working capital operating cycle. (5 marks)
- (b) Lakers Ltd. has annual sales of Sh.50,735,000 and maintains an average inventory level of Sh.15,012,000. The average accounts receivable balance outstanding is Sh.10,008,000. The company makes all purchases on credit and has always paid on the 30<sup>th</sup> day. The company is now going to take full advantage of trade credit and pay its suppliers on the 40<sup>th</sup> day. Its sales can be maintained at existing levels but inventory can be reduced by Sh.1,946,000 and accounts receivable reduced by Sh.1,946,000. There are 365 days in a year.

**Required:**

- Determine the net change in the cash conversion cycle. (6 marks)
- (c) A prospective investor bought shares of Kenland Paints Ltd. at the start of the year for Sh.25 each. The forecasted price of each share at the end of the year and probability of their occurrence in different states of nature are given as follows:

State of nature	Probability	Forecasted share price Sh.
Good	0.20	30
Fair	0.40	27
Poor	0.40	24

**Required:**

- (i) Expected rate of return. (3 marks)
- (ii) The standard deviation of return. (4 marks)
- (iii) The relative risk. (2 marks)  
(Total: 20 marks)

### QUESTION FIVE

- (a) Distinguish between "systematic risk" and "unsystematic risk". (4 marks)
- (b) Omena Ltd's capital structure which is considered to be optimal is given as follows:

	Sh. "000"
Ordinary share capital (Sh.10 each)	5,000
Reserves	1,000
14% Debenture (Sh.100 each)	3,000
12% Preference share capital (Sh.20 each)	<u>1,000</u>
	<u>10,000</u>

The firm is contemplating raising an additional Sh.5,000,000 to finance a capital investment which is expected to generate annual net cash flows of Sh.1,600,000 over its 5 years useful life. No resale value is expected at the end of its useful life.

The firm expects to generate Sh. 1,000,000 from internal sources to finance the investment activity.

**Additional information:**

1. New ordinary shares can be issued at Sh.50 each. A floatation cost of Sh.5 per share will be incurred. The most recent dividend paid was Sh.2 per share.
2. The firm's future dividends are expected to grow at a constant rate of 5% each year in perpetuity.
3. New 10%, redeemable debentures will be issued at Sh.105 per unit. The par value for each unit is Sh.100 and a floatation cost of 10% of par value will be incurred. The debenture will mature after 10 years.
4. New 12% irredeemable preference shares will be issued at Sh.28 each subject to a floatation cost of Sh.3 per share issued. The par value is Sh.20 per share.
5. Corporation tax rate is 30%.

**Required:**

- (i) The cost of retained profit. (2 marks)
- (ii) The cost of ordinary share capital. (2 marks)
- (iii) The after tax cost of new 10% redeemable debentures. (3 marks)
- (iv) The cost of new 12% irredeemable preference share capital. (2 marks)
- (v) The firm's weighted marginal cost of capital (WMCC). (4 marks)
- (vi) Using the Net Present Value (NPV) technique, advise on the suitability or otherwise of the proposed project (3 marks)

**(Total: 20 marks)**
